PROFESSIONAL SUMMARY

Computer Science graduate specializing in Machine Learning, Deep Learning, Generative AI, and Computer Vision, with hands-on experience in data preprocessing, feature engineering, model training, and evaluation. Proficient in Python, TensorFlow, and PyTorch for ML/DL, and in LangChain, RAG, and Transformers for building LLM-powered Generative AI applications, including prompt engineering and AI chatbots. Skilled in SQL, Power BI, and EDA, with a track record of accuracy and ownership in independent deliverables.

CORE COMPETENCIES

Machine Learning & Deep Learning • Generative AI & LLM Application Development • Prompt Engineering & Retrieval-Augmented Generation (RAG) • Computer Vision & Image Classification • Feature Engineering & Model Tuning • Model Validation, Testing & Documentation • Data Extraction, Cleaning & Validation (EDA) • Dashboard & Scorecard Development (Power BI) • SQL (MySQL) • API Integration • Stakeholder Communication • Statistical Analysis • Process Improvement & Automation

TECHNICAL SKILLS

- **Machine Learning & AI/ML:** Scikit-learn, TensorFlow, PyTorch, Feature Engineering, Model Tuning, Model Evaluation & Benchmarking
- **Generative AI:** Large Language Models (LLM), Transformers, LangChain, Retrieval-Augmented Generation (RAG), Prompt Engineering, Multi-Agent Systems, AI Chatbots
- **Computer Vision:** Image Classification, Deep Learning-based Image Analysis, Data Preprocessing & Augmentation, Pixel-level Data Extraction & Validation
- **Data Analysis & Visualization:** Power BI (Dashboard & Scorecard Creation), Advanced MS Excel (Pivot Tables, complex formulas, VLOOKUP), MIS Reporting, Exploratory Data Analysis (EDA)
- **Programming & Database:** Python, SQL (MySQL)
- **Data Analysis Libraries:** NumPy, Pandas, Matplotlib, Seaborn
- **Statistics:** Descriptive & Inferential Statistics, Hypothesis Testing, Confidence Intervals
- **Automation & Tools:** N8N, Git & GitHub, Postman, MS Office (Word, Excel, PowerPoint)

RELEVANT PROJECTS

Blog Writing Agent (Generative AI / LLM Multi-Agent System)

[Live Demo](#) / [GitHub](#)

- Built an intelligent multi-agent Generative AI system that takes a topic and automatically researches, plans, and writes a complete technical blog post using LLMs.
- Designed a structured agentic workflow where the system decides if research is needed, retrieves sources, creates a detailed outline, generates content across sections in parallel, and merges them into a polished article — applying prompt engineering and retrieval-augmented (RAG) techniques.
- Developed a conversational interface enabling users to generate blogs, inspect the plan and evidence, view live progress, and download the final AI-generated article.

Cassava Leaf Disease Classification (Computer Vision / Deep Learning)

[GitHub](#)

- Built a deep learning image classification model (TensorFlow/Keras) across five disease categories, covering data preprocessing, augmentation, model training, and feature engineering — demonstrating applied Computer Vision and ML/AI thinking.
- Performed model validation and evaluation using accuracy, precision, recall, F1-score, and confusion matrix, benchmarking results and presenting them in a structured, metric-driven format for stakeholder review.

Color Picker (Computer Vision / Image Data Extraction)

[Live Demo](#) / [GitHub](#)

- Built a system to extract and validate pixel-level color data from user-uploaded images, applying computer vision techniques and requiring careful visual inspection and quality-checking of output accuracy.
- Verified extracted colors against expected clusters to ensure consistency, mirroring quality-assurance and model-validation workflows used in AI/ML and business reporting.

INTERNSHIP EXPERIENCE

React Native App Developer Intern — Mobiloitte Technology India Pvt. Ltd.	<i>Jan 2025 – Apr 2025</i>
• Collaborated with a cross-functional team in an Agile environment to develop the frontend of an investment mobile app, gathering requirements and delivering features against deadlines. • Strengthened skills in JavaScript, UI/UX design, API integration, and performance optimization while ensuring accuracy and consistency of delivered features; participated in testing, debugging, and validation of features prior to release.	

EDUCATION

Bachelor of Technology in Computer Science and Engineering	<i>Dec 2021 – Jul 2025</i>
<i>Gandhi Institute For Technology, Bhubaneswar CGPA: 7.61</i>	
12th / Intermediate — Science Stream	<i>Aug 2019 – Apr 2021</i>
<i>Govt. Higher Secondary School, Chatrapur 74%</i>	
10th / Matriculation	<i>Mar 2019</i>
<i>Saraswati Sishu Vidya Mandir, Chatrapur 74.83%</i>
